

# T.R.A.P

## *THEFT REDUCTION ACTION PROGRAM*

During the previous two years the Mesa Police Department's Central Patrol Division's Community Action Team has been researching methods of creating an ultimate community-policing program for the City of Mesa's business community. At the same time, the Mesa Police Department was looking for a way to reduce patrol officer workloads without affecting the premiere service our business community has come to expect from the Mesa Police Department.

In April of 1999, the Mesa Police Department implemented the Theft Reduction Action Program (T.R.A.P) as a pilot program working with a selected retail store in the city. By August of 1999, the success of the program far surpassed all expectations - a 54 % reduction in officer response to shoplifting calls was achieved. Actual incidents of shoplifting **fell** by 21 %.

The Theft Reduction Action Program has been instituted citywide and is being shared with other law enforcement agencies in the state.

Officer Helen Simmonds

## Acknowledgements

**Wal-Mart** at 1305 W. Main St., in Mesa, AZ. - this retail location allowed us to implement the pilot project in their store. Wal-Mart Manager Steve Curr was an integral part of the success of the program. He encouraged, cooperated, negotiated and provided vital resources to allow our Community Policing Officers to succeed. Steve shared the same enthusiasm and desire to make his store the safest retail outlet in the City as our officers had in implementing the Theft Reduction Action Program (T.R.A.P.).

A special thanks to the officers of the Mesa Police Department's **Central Patrol Division's Community Action Team** whose ideas and efforts made the program a success. **Officer Simmonds** was named as the Department's first T.R.A.P. officer. Since its inception, she has been a driving force behind the program, training civilians, handling the case load from the stores and establishing working relationships between all stake holders. She has provided training and assistance to other law enforcement departments throughout the Phoenix metropolitan area.

**Chief Jan Strauss, Commanders Gil Otanez and Rick Clore, and Lieutenant John Pruitt** have provided the encouragement, support, resources and enthusiasm to make the Theft Reduction Action Program a reality. Lieutenant Pruitt was instrumental in assisting with the formatting of the proposal and written documents needed to gain support from the Police Departmental Staff for the program. His knowledge of community policing and support for officers played a major role in the success of the program.

The Mesa Police Department's **Crime Analysis Unit** provided the data needed to determine the needs of our business community. The unit provided an instrument known as "The Top Fifteen Locations for Calls in the Districts." This was used to help the community action officers identify the need for a community policing approach for Mesa's business community.

Other retail stores in the City of Mesa have now joined the T.R.A.P. program. These stores include Target, Fry's, Sears, Mervyn's and Albertson's. We thank each of them for their desire to be part of this proactive community-policing program.

Finally, the **Mesa City Court** provided resources to make the Summons in Lieu of Citation portion of the program a success. Their efforts have helped reduce the workload of patrol officers who no longer need to respond to the majority misdemeanor shoplifting offenses. A special thanks to **Chief Prosecutor Lowell Hamilton** for his continued support.

To those individuals we may not have mentioned who have contributed to the success of this program, we extend our gratitude.

## Theft Reduction Action Program

In the city of Mesa, Arizona the Mesa Police Department takes great pride in creating and implementing innovative strategies to deal with criminal activity in the city. Evidence of this commitment include programs such as the Crime Free Multi-Housing Program - an innovative plan to reduce crime in areas such as apartment complexes; the Crime Free Mini-Storage program; the Crime Free Motel/Hotel Program; the Crime Free Mobile Home Program - applications of the Crime Free Multi-Housing program to other community members; and The Center Against Family Violence - a community policing approach to preventing, detecting and prosecuting crimes involving family violence and sex crimes. Now, the Mesa Police Department can add yet another community policing success story to its accomplishments - **The Theft Reduction Action Program (T.R.A.P.)**.

The T.R.A.P. program is the result of the department's Central Patrol Division's Community Action Team (C.A.T.) seeking methods to better serve our business communities and reduce crimes related to the business communities in the city. The crimes that can occur at any business include murder, armed robbery, rape, kidnapping, car theft, car jackings, and purse thefts, forgeries and stolen credit card use. Theft is the crime of greatest frequency committed at business locations. The resulting loss to retail establishments nationwide exceeds 1 billion dollars a year. C.A.T. wanted to create a program that would assist the business community in reducing the amount of thefts they experienced.

The initial T.R.A.P. pilot project was implemented at a busy Wal-Mart store located in the west central portion of the city. The Wal-Mart is in a retail strip mall that is occupied by twelve small businesses (e.g., hair salon, sandwich shop and ice cream store, etc...). A major grocery store anchor shares the strip with the Wal-Mart. The strip mall is in an area of older hotels, a technical school, car dealers, boat dealer and other businesses. The Walmart is located on Main St. - a busy major east/west thoroughfare that virtually splits the city of Mesa in half from north to south.

The Wal-Mart was one of the areas in the entire Central Patrol Division that was consistently in the top three for numbers of calls for service at a given location. A three-month pilot project was conducted from May of 1999 to July of 1999. Upon completion of the pilot project, an over 50% reduction in police response to the store was accomplished. The Mesa Police Department had implemented a plan that empowered Walmart store loss prevention officers to capture more shoplifters, reduce the need for police response and establish a strong cooperative relationship between Walmart and the Mesa Police Department. The relationship became so strong that letters of gratitude were sent from Walmart's management to officers of the police department involved in T.R.A.P. In turn, Walmart's manager Steve Curry, who was instrumental in the implementation of the program, has received Mesa's Meritorious Service Award for a citizen, (see Appendix 8).

Since the completion of the pilot project in August of 1999, T.R.A.P. has expanded citywide in Mesa. Target, Kmart, Albertson's and Sears are some of the stores who have discovered the value of T.R.A.P. Officer Helen Simmonds is helping other departments in the Phoenix metropolitan area implement T.R.A.P. She has even received out of state inquiries.

## Introduction

Mesa, Arizona is the third largest city in the State of Arizona with a population of over 407,000 people. Mesa is located east of the City of Phoenix and has a reputation of being a family oriented community. Mesa ranked as the fastest growing city in the United States for cities with populations in excess of 100,000 people in the 1990 Census and is the 46<sup>th</sup> largest city in the United States. Entrepreneur magazine ranked Mesa as one of the "Top Nine Cities to Start a Business" in its May 1992 issue.

The Mesa Police Department has 711 sworn police officers and 414 civilian employees. The Department's various units include narcotics, gang, motorcycle, air support, K-9, D.A.R.E., criminal investigations, bike, community relations and community policing teams.

The community policing initiative began in Mesa in 1990. During the early portion of the decade, Neighborhood Watch, Victim's Assistance and education on Problem Oriented Policing was the basis of community policing in Mesa. In 1993, the entire department would receive training in problem solving methods. This was the introduction of the Scanning, Analyze, Respond and Assess (S.A.R.A.) model to police officers in Mesa. Mesa would also turn back the hands of time in the early 90's and step away from the modern technology of the patrol unit and create a bike unit. Bringing officers closer to the public was a philosophy beginning to gain ground in Mesa.

In 1996, Mesa would establish a 13 member Community Action Team (two sergeants and eleven officers) whose function would be committed to problem solving. The funding for the unit came from the C.O.P.S. Ahead grants that the Federal government handed out to police agencies willing to establish community policing in their departments. The unit now stands at twenty officers and four supervisors. The units are split equally among the four police districts in the city. The focus of these Community Action Teams is city wide problem oriented policing.

The community policing mindset in Mesa has garnered significant recognition locally and nationwide. Established programs include the internationally known Crime Free Multi-Housing Program, Crime Free Hotel/Motel Program, Crime Free Mini-Storage Program, Crime Free Mobile Home Park Program, and the Crime Free Property Redistribution Program. Additionally, there are the Police Minority Relations, Center Against Family Violence, Neighborhood/Community Police Stations, Bike Units, Community Action Teams (C.A.T.) - formerly the community policing units, Cultural Diversity Team and now, the **Theft Reduction Action Program (T.R.A.P.)**.

## Scanning

By 1997, the Mesa Police Department's community policing efforts had impacted virtually every segment of the city. The Community Action Teams were dealing with problems in neighborhoods, and finding viable solutions to issues brought to the attention of the Community Action Teams.

Through the Police Minority Relations initiative, officers were meeting with the minority populations at their churches. Police use of force discussions, gang education/prevention, youth programs and crime prevention was brought to the minority communities via the churches. Bike units were being used to patrol schools, business districts and neighborhoods. The Multi Crime Free Multi-Housing Program was helping to keep criminal activity in check at apartment complexes throughout the city. However, no *specific* community-policing program was in place to combat the criminal activity faced by our local business community.

In 1998, the Central Patrol Division's Community Action Team began to focus efforts on crime reduction at business locations throughout the Central district. Information was gathered to determine what types of crimes were committed at business locations. The main crime category was determined to be thefts. Thefts in the form of shoplifting, purse snatchings, auto thefts from the parking lots and employee theft. Theft of money from businesses by force or threatened use of force (extortion, robbery, and armed robbery) occurs within business communities throughout the nation, with Mesa being no exception.

Shoplifting and theft apprehensions were rarely made by a patrol officer witnessing a theft in progress at a retail establishment in the city. Loss prevention officers hired by the individual retail stores apprehend most shoplifters. They in turn notify the police who respond, and in most cases (misdemeanors) issue a citation to the suspect and send him/her on their way. The amount of time an officer took to handle the shoplifting could quickly reach between two and three hours. The loss prevention officer would also need to remain with the officer until the officer completed his/her part of the arrest. The Central Community Action Team was determined to find a more efficient process for the handling of theft cases, and minimize all forms of crime in our business community.

## Analysis

During 1999, 2,236 shoplifting cases were reported to the Mesa Police Department 4,313 commercial thefts, 242 armed robberies, 698 forgeries and 685 credit card frauds. These are **reported crimes** only. Many thefts are not discovered until inventory checks are conducted. The actual number of thefts could be significantly higher.

An instrument entitled "*Top 15 Addresses for Calls for Service*" (see appendix 6), was created by the Mesa Police department's Crime Analysis Unit. Use of this instrument was an initial part of the analysis. The instrument listed the top fifteen addresses in each patrol district by the number of calls for service. [Note - during 1997, three patrol districts existed in Mesa.] In the Central district the Wal-Mart was consistently in the number one spot. When not in the number one spot it would occupy one of the top five spots.

The analysis of other district's top calls for service locations also had business communities at or near the top of the list. In the Dobson district, 1425 W. Southern listed in Appendix 6 is the Fiesta Mall - a large regional shopping center. In the Superstition district 6555 E. Southern is the Superstition Springs Mall, another large regional shopping center.

An officer who would respond to a call of a shoplifter in custody could spend an average of two to three hours on a call where an item worth \$20.00 was stolen. In the first quarter of 1999, Mesa patrol officers expended nearly 1100 man-hours (see last page of Appendix 1) on shoplifting in custody cases. This does not include court time if the defendant pled not guilty to the arrest.

During the analysis phase we also determined that certain business communities are populated throughout the day to the point they reach populations comparable to medium to large size cities. For example, the Walmart that was used for the pilot project would have an average of nearly 40,000 people pass through its doors during a one-week time frame. The Walmart is located in a plaza that contains restaurants, a major food chain and other specialty stores. Adding the stores together the one-week population could easily exceed 100,000 visitors, or an average of approximately 14,000 visitors per day. Mesa's two large malls during certain holidays could attract a million plus visitors during a week's time. An average week can range between a quarter million and a half million.

The numbers of individuals who frequent our business communities increases the potential for victimization to the businesses as well as the honest shopper. The types of individuals committing theft crimes in Mesa include juveniles, professional shoplifters, kleptomaniacs, impulse thieves and drug addicts. The drug addicts in Mesa are responsible for a significant portion of theft in the Mesa business communities. These individuals are involved in multiple crimes including shoplifting, credit card fraud, forgeries, fraud schemes, price switching, theft of checks and credit cards.

From an analysis of our arrest and interviews, we have also found that some of these individuals have crossed over into the category of professional criminals. One female suspect arrested by Officer Simmonds has been stealing from stores in the Valley of the Sun (Phoenix metropolitan area) for over six years, to the tune of over \$100,000 in stolen merchandise.

### **Analysis of the Traditional Response to Business Community Criminal Activity**

The Mesa Police Department response to business community crime was a typical traditional reactive response prior to T.R.A.P. In the case of a shoplifting complaint Mesa would send an officer to take a police report. If a person was detained for a theft offense an officer would respond to issue a citation and, on some occasions (i.e., no identification, violent, warrants) the suspect would be taken into custody and booked at the Mesa City jail.

Retail stores that employed loss prevention officers would comment that the response time in Mesa was swift in comparison to other cities in the surrounding area. Mesa considers a person in custody as a priority one call. This status is just below an emergency response priority call. The call must be dispatched to a street officer within two minutes. In comparison several nearby cities would, at times, take in excess of two hours to respond an officer to a shoplifter in custody.

With the growth that is occurring in the City of Mesa it would be just a matter of time before Mesa would have to re-evaluate the need to send an officer expeditiously to a call involving a person in custody for the theft of a small dollar item. A plan was needed that could reduce the need for officers to respond to some in custody theft calls without reducing police service to the retail business community. The paradox became developing a plan that would decrease officer workload and increase the efficiency of the business community and police department to reduce crime.

## RESPONSE

The response to the paradox mentioned in the analysis phase of this report is the **Theft Reduction Action Program**. The program is the brainchild of members of the Mesa Police Department's Central Division's Community Action Team. See Appendix 1 to view the official proposal for T.R.A.P. made to Mesa Police Staff.

**The Goal of the Theft Reduction Action Program:** To significantly reduce the need of patrol officers to respond to misdemeanor shoplifting calls while increasing the ability (empowerment) of business communities to reduce criminal activity on their properties.

The Theft Reduction Action Program (T.R.A.P.) consist of two components. Component one focuses on the empowerment of the retail stores to minimize crime at their stores. Component two is a method of reducing the need for officers to respond to misdemeanor shoplifting calls.

### **Component One: The Theft Reduction Action Plan**

The Theft Reduction Action Plan has four core objectives:

1. Establish a strong working relationship with the business community.
2. Share intelligence information with loss prevention officers throughout the Phoenix metropolitan area.
3. A public relations campaign promoting the team effort between the Mesa Police Department and the business community (see Appendix 4).
4. Increased communication between the business community, community action officers, patrol officers, detectives and the Mesa City court system.

### **Component Two: Summons in Lieu of Citation**

The Summons in Lieu of Citation (SILOC) allows a store loss prevention officer to complete the needed paperwork to have the suspect summons to court and answer to the shoplifting charge. A patrol beat officer no longer needs to respond to misdemeanor (total product value less than \$100.00) shoplifting cases if the suspect has no warrants, proper identification, not under the influence of any drugs and no physical force greater than passive resistance was used to affect the arrest.

This component of the program would allow the store's loss prevention officer to get back onto the floor immediately following the completion of his/her paperwork with the suspect without having to wait for the responding police officer. The Mesa Police

department T.R.A.P. officer picks up the store reports; reviews the cases to make sure the arrests are valid; and files the cases in the City Court. A summons is then issued for the defendant. Whether a patrol officer responds or the case is handled through SILOC, the end result is the same; the defendant receives a summons to appear in court.

## Assessment

The Theft Reduction Action Program (T.R.A.P.) began a three-month pilot phase (see Appendix ) on May 17, 1999. The pilot program was conducted at a Walmart located in the Central patrol district of the Mesa Police Department. The pilot project was a tremendous success. During the pilot project all objectives listed in the response section of this report were met. Officer Helen Simmonds, the first T.R.A.P. officer for the Mesa Police Department established a solid working relationship with the Wal-Mart that included the education of Wal-Mart employees in the area of crime prevention. She also met on a regular basis with loss prevention officers to share intelligence information. A strong working relationship was developed with criminal investigations, patrol and the Mesa Court.

Officer Simmonds held educational seminars for Wal-Mart employees that included the recognition of counterfeit money, credit card fraud and identifying drug suspects by the products they purchase. Officer Simmonds first seminar paid of immediately as a recently educated employee of Wal-Mart identified two individuals he observed purchasing Sudafed - ephedrine in Sudafed is a precursor chemical used in the manufacturing of the dangerous street drug methamphetamine. He notified Officer Simmonds who then provided the information to Mesa narcotic detectives. Subsequently, a dangerous methamphetamine lab was located and promptly dismantled.

Officer Simmonds also increased her skills in identifying the criminal element who frequent retail stores. While conducting a plain-clothes operation at a Target store in Mesa, Officer Simmonds observed two suspicious individuals in the store loading up a shopping cart with various items in a hurried manner. She had obtained intelligence information on individuals who would load up shopping carts and then exit the store to a waiting vehicle through an emergency exit in the rear of the store. The two suspects involved in this caper were arrested shortly after leaving the Target store for possession of stolen property, credit card fraud and narcotics possession. The manager in charge of the store on this date was overwhelmingly thankful for the services rendered by the Mesa Police Department.

Officer Simmonds has made numerous arrests of career type criminals working as a T.R.A.P. officer. One of the Benevolent Order of Elks chapters in Mesa was so impressed with her work they named Officer Simmonds the Mesa Elk's Officer of the Year (See Appendix 9).

Component two of the program was also deemed a tremendous success. The Summons in Lieu of Citation resulted in a 55% reduction in patrol officers responding to the Wal-Mart for misdemeanor shoplifting calls. A surprise to those involved in the program was the significant reduction in shoplifting (21%) when compared to the same time frame during the previous year. The original belief was that shoplifting arrests would increase significantly because of the additional time for loss prevention officers to be able to

detect shoplifters. One loss prevention officer commented that the store had to lower the number of arrests loss prevention officers are required to make because of T.R. A.P. The increased police presence and the signs warning of the cooperative effort between the Police Department and Walmart were having the intended impact.

### **Program Expansion**

Since the completion of the pilot program in August of 1999, the program has been taken citywide. Grocery stores, Wal-Mart, Target, Sears and many others have joined forces with T.R. A.P. At loss prevention meetings attended by Officer Simmonds, she has been requested to assist in expanding T.R.A.P. in various locations in the Phoenix metropolitan area. Out of state inquiries have also come in requesting information on the program.

### **Future Implications for T.R.A.P.**

The 2236 shoplifting cases Mesa police officers handled in 1999, resulted in an expenditure of 6708 man hours by the department (number of cases multiplied by a three hour average spent on each case). Based on the pilot project T.R.A.P. should be able to reduce the 2236 shoplifting cases officers responded to in 1999 by half. This would result in the savings of 3354 police man-hours.

At the present time the retail businesses are only using T.R.A.P. for cases of shoplifting with losses of one hundred dollars or less. As they become more confident in the program the department would like to up the loss amount to the statutory limit of \$250.00 for misdemeanor crimes. Such a change would bring almost all such thefts under T.R.A.P.

## Agency Information

### Level of Involvement

One officer (Helen Simmonds) was assigned from the Central Community Action Team to be the T.R.A.P. Coordinator. She has literally become the business community police officer. Officer Simmonds has involved other community action officers in her projects and has gained assistance from other divisions in the department, such as the Criminal Investigation Unit and the Gang Enforcement Unit.

### Training

Officer Simmonds attended briefings to educate officers on the fundamentals of the Theft Reduction Action Program. Store employees were educated in the area of crime prevention at their stores and loss prevention officers were trained how to write reports containing the proper elements of a crime.

### Resources

Community Action Team officers in each patrol district are encouraged to work with T.R.A.P.

### Program Obstacles

Some obstacles were overcome early on during the implementation stage of the program. Concerns expressed by supervisors during the original proposal presentation to Mesa Police Department Staff included: legalities of giving out warrant information to civilians, and loss of intelligence information because officers would no longer be interviewing shoplifting suspects.

The Department's Legal Unit checked on the legalities of providing information to loss prevention officers about the wanted status of an in custody shoplifter. The determination was that the information could be provided. In the matter of loss intelligence information we have found the contrary to be true. Officer Simmonds has gathered a plethora of intelligence information as a T.R.A.P. Officer.

### Synopsis

The Theft Reduction Action Program has accomplished the established goals - crime reduction, enhanced relationships between the business community and Mesa Police

Department. T.R.A.P. has allowed the Mesa Police Department to boast a community policing initiative in every aspect of our community (neighborhoods, schools, churches, and now the business community).

## APPENDIX 2

END OF TRAP PILOT REPORT

## CITY OF MESA POLICE DEPARTMENT MEMO

To: CHIEF and POLICE DEPARTMENT STAFF  
Through: COMMANDER GIL OTANEZ  
From: LIEUTENANT JOHN PRUITT, SERGEANT JIM SCHWEISTHAL and  
OFFICER HELEN SIMMONDS  
Date: AUGUST 12, 1999  
RE: END OF TRAP PILOT REPORT

---

### Recommendation

The Community Action Team recommends TRAP be expanded in two phases throughout the City of **Mesa**. The first phase would last three months and would expand the program throughout the Central District. The second phase would **expand** the program into the other three Patrol Districts.

### History

The Theft Reduction Action Program (TRAP) began a three-month pilot phase on May 17, 1999. The pilot program was conducted at the Wal-Mart at 1305 W. Main Street, Mesa AZ. The goals of the pilot program were to reduce the incident of misdemeanor crimes at the store, reduce the number of calls for service to the Central Patrol District officers and to establish a working relationship between the retail **merchant**, the City Prosecutor's Office and the Police Department. At the end of the three months the pilot program has been a success.

### Discussion

It was anticipated that there would be an immediate decrease in the number of calls for service that required a patrol response because of the Summons in Lieu of Citation part of the program. As indicated in the chart 1, this did in fact happen. It was, also, anticipated that there would be an immediate increase in the total number of shoplifters apprehended due to the increase in time available to the **loss** prevention agents of the store. This did not occur because **our** expectation that the other features of TRAP, such as the signs and increased awareness, would take a protracted time period to be effective was erroneous. Unexpectedly, the crime prevention aspects of TRAP yielded immediate benefits and reduced the actual occurrence of shoplifting.

During the pilot program (May, June and July) there was a 21% reduction in the incidents of shoplifting and a 55% reduction in Patrol Officer responses. The working relationship between the store, the City Prosecutor's Office and this Department was established. And it is in place, ready for expansion. Therefore, the goals of the pilot program were met and our expectations were exceeded. Based on this the Central CAT considers the pilot a great success and recommends the program's expansion.

Month	Shoplifting Calls		% Change	Patrol Responses		% Change
	1998	1999		'98	'99	
May	26	18		26	13	
June	26	23		26	14	
July	17	13		17	11	
Totals	69	54	21%	69	38	55%

**Chart 1.**

**Note:** During the pilot program there were 16 cases referred to SILOC.

## APENDIX 3

### 1999 YEARLY CALLS FOR SERVICE REPORT

CITY OF MESA, ARIZONA  
POLICE DEPARTMENT  
CALLS FOR SERVICE

YEARLY REPORT  
1999

CRIME ANALYSIS UNIT  
MESA POLICE DEPARTMENT

Part of the responsibility of the Crime Analysis Unit of the Mesa Police Department is to provide timely and pertinent information **both** to the City and the public in regards to crime frequencies and patterns. In an effort to further this responsibility, the unit is providing general information regarding the work load of the patrol division of the Mesa Police **Department**. This information **is** attached with this memo and consists of Beat Statistics for the Year 1999 for the City of Mesa.

These statistics are contained in four reports, one for each geographical district within the City. These districts currently consist of the Dobson District, the Central District, Falcon **District** and the **Superstition District**. The boundaries of these districts are shown on the attached city map. Each district is further divided into a series of areas with the City called "**beats**". Each district report includes a map of the district showing the current beat boundaries. Note: As of June **1999**, these beats were changed from the previous ones. The new beats are reflected in the maps.

The information contained in the report is based on calls for service received by the department where an officer or officer(s) are **actually** dispatched. It is broken down into several areas of concern: 1. Disposition Codes (DC codes) - These are codes given to each call by the assigned officer at the conclusion of the call. 2. Average response times based on the priority of the **call**. Each call for service is given a priority rating depending on the information received as to the urgency of the call. Emergency calls are given an "E" status. The reported figure is the average time from receiving the call to the time that officers arrive at the scene. 3. The actual count of the various types of calls within the beats. Each **call** type is classified and the count for each type is reported for the individual beat.

These totals **will** be updated each **quarter** and are distributed to all districts. In addition, they will be made available to the public through the TeJeserve desk (Front Desk) at the main police station and the **Mesa** Public Library. There is also beat information that may be accessed on the internet at

[http://www.ci.mesa.az.us/police/crime\\_analysis\\_unit.htm](http://www.ci.mesa.az.us/police/crime_analysis_unit.htm)

This internet information is being expanded on a constant basis so check frequently.

We hope that you will find this information **helpful** to you.

## HOW TO USE THESE CHARTS

1. Determine the area of the City that you are interested in checking the statistics in and then locate this area on the map of the City. Determine which district it is in - i.e. **Dobson, Central, Falcon, or Superstition.**
2. Look at the **District Map** for the district in question and determine which **Beat Number** that the concerned area falls into.
3. Locate that **Beat Number** in the reported totals and review the statistics.

### Notes:

Beat 81 of the Falcon District encompasses the area of Williams Gateway Airport and is not included in the **district** totals or averages.

This information is extracted from raw CAD data. The accuracy of the information is based on proper CAD operation and data entry. Chances for error are possible.

**DOBSON DISTRICT - BEATS 11 to 17**

**DOBSON CAD/RECORDS BEAT STATISTICS**  
**Yearly Report - 1999**

	Overall Dobson Statistics

# Mobil Homes and RV Parks

## Calls for Service for the Year - 1999

NOTE: These parks are classified in two areas: 1) FAMILY PARKS (those that allow children) and 2) SENIOR PARKS that limit residents to those being above a certain age.

### Definitions

**CFS:** Calls for Service - (This does NOT necessarily indicate a crime occurred - only that a police interaction occurred).

**Units:** Number of housing units in the park.

**Type:** Type of Park (Family or Senior).

**Ratio:** Number of CFS per unit.

**Level:** Variation above or below the Citywide CFS ratio.

\* = Complex is a member of the Crime-Free Mobile-Housing Program

# = Complex participates (not certified) in Crime-Free Mobile-Housing Program.

Citywide Ratio for 1999 for FAMILY PARKS ONLY: 1.06
