Nature of Problem to be Addressed
Crime, the fear of crime and anti-social behaviour.

Evidence Used to Define the Problems
Statistical information from our Crime Analysts, including background, crime patterns analysis, location profiles, victim and offender profiles, intelligence, analysis of the problems and proposals for future action.

Response to the Problems
This came from our commitment to a partnership approach with local Community Forums, to address community safety issues and improve the quality of life for all. A decision was made to pilot an 'Alert Communities in Action Project' in the Eglinton and District area. A community safety audit was conducted and the project commenced with a high profile launch on 15 April 2003. A decision has since been made by the 11 Community Forums operating in the Derry City Council area and the police to expand the project through the Foyle District Command area.
Impact of the Response

This is measured in qualitative terms by:-

- Increased awareness of community safety
- Increased awareness of personal safety
- Increased levels of well being
- Increased linkage and liaison with local statutory/voluntary agencies
- Crime pattern analysis is also used to examine the success of the project

Attached at Appendix 'A', please find a description of the project, which includes:-

- The objectives of the project
- How the problems were defined, including crime pattern analysis for domestic burglaries, criminal damage, vehicle crime and youths causing annoyance
- Methods to deal with the problems

Attached at Appendix 'B', please find a description of the pilot project carried out in the Eglinton and District area, which has greatly increased awareness of community safety issues in general and has encouraged a considerable number of local people to become involved in their local community forum.

Also attached is a press release in relation to the launch of the Eglinton project, the presentation given by Inspector Kerr and Mary Lynch at the launch.

Attached at Appendix 'C', please find letters from the endorsing Chief Officers.

Attached at Appendix 'D', please find details of our aims and objectives to deliver the goal of making 'Policing with the Community' the core function of the PSNI in Foyle District Command Unit.

TILLEY AWARD 2003

Description of the 'Alert Communities in Action'

Project for the Derry City Council Area
ALERT COMMUNITIES IN ACTION –
A COMMUNITY SAFETY PROGRAMME FOR THE DERRY CITY COUNCIL AREA

a) The 11 community forums, which exist in the Derry City Council area, collectively known as the 'Foyle Community Forums', first came together as a chairperson's group on 14 November 2002 as a result of an initiative by Inspector Kerr, the Sector Policing Manager for Foyle DCU. They are now a Community Safety Partnership. This structure has been formalised with a constitution and business plan.

The key partners in this project will be the Foyle Community Forums and the Police Service of Northern Ireland, together with other statutory/voluntary agencies.

The project is proposed by the PSNI Foyle District Command Unit (Inspector Milton Kerr, Sector Policing Manager for Foyle District Command Unit – 028 71 367337, extension 40754 or mobile telephone number 07764 638385).

b) Community safety issues to be addressed. Statistical information and crime pattern analysis are included in the programme.

c) Information on how this project will address the problem is also included in the programme.

d) Funding

Estimated cost of the project for year one –

- Launch of project and publicity £5,000
- Administration and development support £5,000
- Leaflets/posters on community safety £4,000
- Flyers/information cards £4,000
- Alert community signs (to include erection, replacement and insurance) £20,000
- Security packages £10,000
- Installation of packages £6,000

Total amount of financial contribution from other funding sources to be researched.

Estimate of 'in kind' funding from partner organisations to be researched.

Amount applied for – £50,000 in first financial year. A total of £150,000 over a 3 year period.

Arrangements for financial control and accountability – the accounting system will be manual. The project will be overseen by the management committee and monitored financially by a sub committee. This will be reviewed bi-monthly. The organisation will be financially accountable and will provide audited accounts. It is proposed that the management committee will consist of the Foyle Community Forums Partnership, the PSNI and other relevant agencies.
e) **Monitoring and Evaluation**

The project will be measured in qualitative terms by topics such as:

- Increased awareness of community safety
- Increased awareness of personal safety
- Increased levels of well being
- Increased linkage and liaison with local statutory/voluntary agencies and the PSNI

The project will be monitored and evaluated using the voluntary activity unit method of evaluation.

*Police Service of Northern Ireland*
ALERT COMMUNITIES IN ACTION

A community safety programme for the Derry District Council area

A project proposed by the PSNI and the 11 community forums which exist in the council area (Foyle Community Forums Partnership)

1. Future Forum (Rosemount/Creggan)
2. Shantallow North Forum (includes Galliagh/Ballymagroarty)
3. Culmore Rural Forum
4. Fountain Forum
5. City Centre Forum (includes Bogside)
6. Waterside Urban Forum
7. Waterside Rural Forum (Newbuildings/Tullyally/Currynierin/Drumahoe/Prehen/Strathfoyle)
8. Eglinton and District Forum
9. Claudy and Larnmount Forum (includes Park)
10. Foyle Youth Forum (citywide)
11. North West Forum of People with Disabilities

BE ACTIVE, BE ALERT, BE INVOLVED
BACKGROUND

Eleven community forums now exist in the Derry District Council area. They were formed at different times from interested bodies of local people, some of whom had previously participated on community police liaison committees. Their first joint meeting was held on 14 November 2002 and they now meet every 2 months.

The aims and objectives of the Foyle Community Forum are:

- To make sure that the needs and views of all sections of the community are taken into account as fully as possible on community safety issues.
- To improve community safety by involving local people in finding solutions to local crime and associated problems.
- To improve relations between the police and the community.
- To formalise links with other organisations with a vested interest in public safety, to develop working relationships with them and in particular the Police Service.

The above objectives relate to ongoing community development programmes in the Derry District Council area.

In order to address these objectives and responding to needs assessment already carried out in some areas, the issue of community safety has been identified as an area of concern for local people living in the Foyle Community Forum areas.

These concerns have been identified by consultation with members of the older residents in the area, members of the 11 community forums and by regular meetings/consultation with the local PSNI in Foyle District Command Unit.

The project will be based on evidence obtained from 2 pilot projects currently operating in the Eglinton and Tullyally areas of Derry. These are demonstration projects being conducted following community safety audits, which are currently being carried out by NIAcro in consultation with the community. Both of these projects have been highly publicised in the local press, radio and television and through public information evenings. They were showcased at high profile launches attended by NIO officials, local Myles/councillors and other representative bodies.

This project will initially target 900 local people from each of the 9 geographical community forums in Derry City Council area. These will be disadvantaged persons as identified under Section 75 of the Northern Ireland Equal Opportunities Act. These persons will be identified through the Foyle Community Forums or by referrals from the PSNI and other statutory or voluntary sector agencies.

This project will in the first year, provide signs promoting each area as an ‘Alert Community Area’. Leaflets and posters will be produced promoting a ‘Good Neighbour Scheme’ and put in place practical assistance with home security measures for those identified in need ie door lock, door viewer, personal alarm and front door camera linked to television where necessary. Further initiatives will follow in years 2 and 3.

The 3 year project will create a partnership approach to community safety issues in Derry City Council area and will evidence the need for further work in creating an active alert community.
SAFE IN THE COMMUNITY

The concept of community safety and the need to feel secure within your own home is particularly necessary for the elderly, vulnerable and persons with disabilities. The project will seek to create a sense of well being and community participation among its participants. It will also strive to create a partnership approach to the issues of community safety, particularly crime, the fear of crime and anti-social behaviour.

WHAT IS AN 'ALERT COMMUNITY'?

In community development terms an 'alert community' is defined as follows:

- An 'alert community' project is a scheme organised by voluntary/community groups in association with the PSNI and other relevant local statutory/voluntary agencies.
- A scheme which aims to increase the safety of older and vulnerable persons.
- Reassurance for the targeted groups living in the City Council area that their neighbours/community are concerned for their well being.
- A project which ensures that 'good neighbours' are alert to suspicious activity in the area and report same to the Police Service as necessary.
- Foster better relations between the local communities and the Police Service and other statutory agencies.
- Develop a 'good neighbour' ethos
  - Get to know your neighbours, particularly those living alone
  - Call in and visit, run an errand – it's something like human contact that counts
  - Be alert – if you see any persons/vehicles acting suspiciously, call the police at any time
  - Keep an eye on your property and that of your neighbours
  - Be aware of safety initiatives.

YOUR COMMUNITY NEEDS YOU – PLAY YOUR PART

BE ACTIVE, BE ALERT, BE INVOLVED

Domestic Burglaries in Foyle DCU

'This information is based on incidents reported from a variety of PSNI sources and is believed to be current at the time of publication. These figures refer to incidents only and do not represent official crime figures. This information has been provided by the PSNI and must not be quoted without express permission of Foyle DCU Commander.'
Background to Problem

- Domestic burglaries in Foyle DCU have been on an increasing trend since October, and have rose to the highest levels in eight months during March 2003, with 57 recorded offences. Domestic burglaries accounts for approximately 10% of all recorded offences in Foyle DCU.

- In the time period 01/04/2002—31/03/2003 there were 513 reported domestic burglaries in the DCU—equivalent to approximately 43 domestic burglaries per month

- 65% of domestic burglaries occur in the Cityside, with 25% occurring in the Waterside and the remaining 10% occurring in the rural areas of Claudy and Eglinton.

- In the 12-month period examined, the estimated value of items stolen at domestic burglaries (01/04/02 – 31/03/03) was £192,756

- The clearance rate for all domestic burglaries in 02/03 in Foyle DCU is 9% (based on figures from Saturn). This is compared to 11% clearance for North region.

- Domestic burglary did not meet the Policing Plan target (Oct – Dec 02) which was 42.8 burglaries per month, and is unlikely to meet the targets for the last quarter (Jan – Mar 03).

This report aims to identify hotspot locations and likely victims, profile likely perpetrators (based on characteristics of previous offenders), outline the perceived causes of the problem and suggest some proposals for further action. The report should be used as an aid to planning for a Domestic Burglary Reduction Strategy in Foyle DCU.

Overview of Domestic Burglaries

There has been a total of 513 recorded domestic burglaries in Foyle DCU in the period from 01/04/02—31/03/03—equivalent to approximately 10 domestic burglaries per week. The graph below gives a monthly comparison of recorded domestic burglaries in the DCU for the 12 month period. The graph shows that domestic burglaries were at their highest in July, before falling to their lowest in September, although the graph highlights that burglaries have been on an increasing trend since October, rising to the highest number of incidents in 8 months during March.
Crime Pattern Analysis

Crime Pattern Analysis has been carried out on all domestic burglaries in the DCU from April 2002—March 2003, to identify areas which are most likely to be targeted and key times in which incidents occur.

Analysis shows that 65% of domestic burglaries occur in the Cityside, with 25% occurring in the Waterside and the remaining 10% occurring in the rural areas of Claudy and Eglinton.

Incident Detail Breakdown

MO

MO information recorded on domestic burglaries in Foyle DCU is poor, with information provided lacking detail. One third of all domestic burglary incidents did not have any MO information recorded on ICIS.

Almost half of all incidents (with MO information available) involved forced entry to property. Of these 70% involved forcing a door or door lock. 15% of forced entries involved window frames or glass removed or tampered with.

Almost 30% of incidents were opportunistic, with the culprit walking into an unlocked house.

There were 25 creeper burglaries in the DCU, half of which involved the actual theft of the vehicle.

There were 9 recorded bogus caller incidents which resulted in burglaries taking place.

The majority of these involved 2 males. Intelligence received regarding these culprits, coupled with various descriptions from IP's resulted in detailed descriptions and names being released to DCU personnel.

Victim Profile

Analysis has been carried out to build up a profile of the victims of domestic burglary in the DCU—this is to aid targeting of crime prevention advice to those most likely to be victims.

Age of victim was analysed in order to identify any age groups which are more vulnerable to domestic burglary i.e. elderly, students. Results indicated that no one particular age group is more likely to be targeted.

In all bogus caller incidents in which a burglary took place, all victims were over the age of 70.

The Occupation of the victim was only recorded in 25% of cases—this poor recording makes it difficult to adequately assess whether particular groups are more at risk than others. Of those recorded, 37% were unemployed, 11% retired and 10% medical professions.
The high number of students living in the City contributes to the high volume of burglaries, particularly in areas such as Rosemount and Lower Strand Road. Both these areas have been identified as main hotspots in the DCU. Although analysis indicated that no particular group is more likely to be identified as victims, this may be due in part to poor recording on crime forms. Due to the high numbers of students living in both these areas, it is likely that students are the victims in these areas. Research has previously highlighted the fact that students are likely to be among the most at risk of burglary. Their age, income, hours leaving property empty, and they usually arrive at their university accommodation with the most popular goods taken at burglaries. Source: Mirrlees-Black et al. 1998 in Burglary Prevention, Home Office.

Poor data recording on Form 38’s within Foyle DCU hinders further analysis being carried out. Firstly, in relation to victims, only 25% of cases had the occupations of victims recorded. This lack of detail makes it difficult to adequately assess whether particular groups of people or occupations, students for example, are more at risk than others. Secondly MO information was not recorded in more than 1/3 of all cases. This makes it difficult to tie certain prolific burglars known in the DCU with similar MO’s to the crime, therefore reducing the number of potential clearances. Clearance levels in Foyle DCU were 9% for domestic burglary, compared with 11% for North region.

There were 30% of all domestic burglaries in Foyle DCU that were opportunistic with burglars entering residences that had unlocked doors and insecure windows. This clearly illustrates the fact that many residents are not security conscious, often leaving their doors unlocked or windows open when they left their property for periods of time.

The most popular items stolen in domestic burglaries are jewellery, cash, audio and electrical equipment and telecom equipment. The majority of these items are small in size, quick to access in the dwelling and could easily be carried on foot, without the help of a vehicle. Home Office research also found that the most commonly stolen items in burglaries were cash, jewellery, videos and audio equipment. The cost of items stolen in burglaries in Foyle DCU for the stated time period was £192,756, which averages almost £400 per household. This does not include the cost of damage caused in burglaries.

The distance travelled to commit crime has proved significant in the analysis. 98% of all offenders accused of burglaries in Foyle DCU in the time period stated live in the City. This is supported by Home Office research which states that most criminals tend to commit crime in areas local to where they live. This finding indicates that when investigating burglaries in the DCU, it is most likely that one of the local prolific burglars may be involved.
Proposals for Further Action

- Multi-agency approach with Council, Housing Executive, Housing Associations re. upgrading dwelling security, and access paths etc.

In order to try and reduce the domestic burglary problem in Foyle DCU, a multi agency approach could be set up with Crime Prevention and the Housing Executive and various Housing associations in the City. The problem could initially be addressed at a meeting, highlighting the main problems relating to domestic burglaries in the City. Various suggestions for reducing the problem could be highlighted including:

- Produce the facts and figures that highlight the reduction of burglaries in residences that have security measures fitted. Chula Vista Police Department carried out an extensive study on domestic burglaries and they found that they could have the greatest impact on domestic burglaries by promoting environmental design characteristics as ‘built in’ features for new housing developments in the City (Source Excellence in Problem-Oriented Policing, COPS). This could be suggested for any new developments planned throughout the City. Measures that could be incorporated include doors with deadbolt locks, secure locks on windows etc.

- Suggest the introduction of a scheme aimed at making available certain categories of householders who may be eligible for free security upgrading on their property. Those eligible may live in certain hotspot areas, for example. All previous victims of burglary could be offered this scheme. A similar system called the KeepSafe Scheme was set up in Cambridge and those eligible included burglary victims, pensioners, people receiving benefits. These people received free door locks. (Source: Preventing Residential Burglary in Cambridge, Trevor Bennet & Linda Durie). Local businesses could be approached in order to see if they would provide funding for this scheme.

- Suggest a scheme aimed at providing and fitting gates etc. to access ways, paths and alley ways at the side and rear of properties, particularly in housing estates where domestic burglaries are a problem. The aim of this is to prevent access to the side and rear of properties by potential offenders.

- Community Forum groups setting up Neighbourhood Watch Schemes

Neighbourhood watch schemes could be set up in conjunction with Community forum groups in the City. Up until recently Police had little or no contact with many areas within the City. Now that the majority of areas have community forum groups police involved could arrange various talks in providing advice on house security, setting up an effective neighbourhood watch scheme and provide advice on the successful running of these schemes.

- Targeted Patrolling

Targeted patrolling of hotspot locations and times highlighted in the Sector analysis provided earlier in the report should be used and built into routine patrolling patterns. Problem locations should be visited a number of times during the hotspot
times identify in order to try and identify any culprits in the area, and to provide a deterrent for committing crime due to the police presence in the area.

- **Introduction of CCTV in Hotspot Areas**

  Discussions with the C.C.I. could take place in order to highlight the various hotspot locations for domestic burglaries and discuss the possibility of the provision of cameras in some of the hotspot areas. The provision of CCTV in these areas may reduce the fear of crime for residents in these areas and may help identify culprits if they are caught on camera.

- **Media Campaign Regarding Home Safety**

  A media campaign could be introduced in conjunction with the local papers and local television giving crime prevention advice on securing properties and various preventative measures in order to deter burglars.
Criminal Damage in Foyle DCU

'This information is based on incidents reported from a variety of PSNI sources and is believed to be current at the time of publication. These figures refer to incidents only and do not represent official crime figures. This information has been provided by the PSNI and must not be quoted without express permission of Foyle DCU Commander.'
Background to Problem

- In the last two months Criminal Damage to Property has risen to a comparable level to Offences Against the Person in Foyle DCU — making it the highest volume crime in the DCU for the first time in 2 years. In March, Criminal Damage to Property accounted for 22% of all recorded offences in Foyle DCU.
- In the time period 01/04/2002 - 31/03/2003, there were 2229 reports of Criminal Damage in the DCU—equivalent to 6 reports per day
- 56% of all reported Criminal Damage in this time period was Damage to Property — a total of 1246 incidents, equivalent to 24 cases per week. The remainder is Damage to Vehicles (19 cases per week)
- 71% of all Criminal Damage to Property is Damage to Private Property, 17% is Damage to Commercial Property, and 12% is Damage to Public Property (such as schools and hospitals)
- In the 12-month period examined, the estimated value of Criminal Damage to Property in Foyle DCU totalled almost ¾ of a million pounds (£747,425)
- The clearance rate for all Criminal Damage in the DCU for 02/03 is 11.6% (as at 11th March 03), compared to a clearance rate of 15.0% for all of North Region (Source: Saturn)

This report aims to identify hotspot locations and repeat victims, profile likely perpetrators (based on characteristics of previous offenders), outline the perceived causes of the problem and suggest some proposals for further action. The report should be used as an aid to planning for a Criminal Damage Reduction Strategy in Foyle DCU.

Overview of Criminal Damage Problem in Foyle DCU

There have been a total of 2229 recorded incidents of Criminal Damage in Foyle DCU in the period from 01/04/02—31/03/03, 56% of which were damage to property. There are currently 24 cases per week of Criminal Damage to Property in the DCU. Criminal Damage to Property accounted for 22% of all Volume Crime in Foyle DCU in March 03.

The graph below gives a monthly comparison of recorded Criminal Damage to Property in the DCU for the 12-month period. It shows that over the last 4 months criminal damage to property has been on an increasing trend (shown by the black line).

The table above shows a breakdown of the type of property which was damaged in the DCU in the 12-month period.

Analysis of problem

- **Broken Windows Theory**
  The Broken Windows Theory suggests that vandalism in a neighbourhood indicates disorder and neglect, encouraging further damage and neglect, and is seen by residents as a sign that crime in their neighbourhood is rising. As residents perceive there to be more crime, their level of fear is increased. Clearly preventing vandalism is important in improving people's quality of life.

- **Fear of Crime and Cost to Victim**
  Findings from the Fear of Crime in Northern Ireland NIO Crime Survey in November 2002 showed that respondents who had recently been victims of crime expressed greater levels of worry about crime and personal safety than did non-victims. This directly impinges on quality of life. In addition, those worst affected by Criminal Damage to property are often poorer individuals/families who are least able to move away or bear the cost of the Damage. The cost to the Victim is not just that of the actual damage but also includes high-rising insurance premiums in areas of high crime. There is also the cost to Housing Associations of moving families and to renters of loss of rent from vandalised homes. An additional cost is the cost of police time in dealing with these incidents and the cost of prosecuting.

- **Problem around arterial routes out of City at pub closing times and Offenders often under influence of alcohol**
  Many incidents of criminal damage to property take place when the offender is under the influence of alcohol. In addition, damage often occurs on arterial routes out of the City in the early hours of the morning, particularly along the Strand Road, Northland Road, Spencer Road and Clooney Terrace. Analysis has also revealed that 61% of offenders are under the influence of alcohol at time of offending. The provision of night-buses out of the City might help alleviate this problem.

- **Link to YCA**
  Home Office research has proven the overlap between anti-social behaviour and youth crime. Analysis of incidents in Foyle found that 26% of offenders in the DCU were aged between 11 - 18. In addition, many of the hotspot areas identified are also areas where YCA is high, and the timing of offences is largely in the evenings. In addition one in three was under the influence of alcohol.
when they committed the crime, again highlighting the underage drinking problem in the DCU. The question is whether this is due to lack of facilities for young people in these areas, or whether something is the area is attracting young people there to congregate.

Difficulty in targeting large proportion of offenders
Home Office research has found that disengaged young men (those not in stable employment or without qualifications) are almost twice as likely to be an offender for Anti-Social Behaviour than other young men. This is borne out in our situation, with unemployed males aged 19-35 being one of our most prominent groups of offenders for Criminal Damage to Property in Foyle DCU. The difficulty is how to target this group to discourage this behaviour.

Housing allocation policies and lack of multi-agency approach
Studies have found that the number of children housed in an area can be a good predictor of an area's rate of criminal damage. Since 26% of all offenders in the DCU in the last year were youths, these findings could probably be applied here. Also since attitudes to actions of youths will vary according to age, and behaviour which is acceptable to one age group might not be acceptable to another, a number of factors will probably contribute to an areas criminal damage problem. These include different layout designs of an area, social make-up of area, interactions of inhabitants in an area and the overall management of an area.

Low detection rate and reporting for insurance purposes only
Almost half of all incidents are reported for insurance purposes only, with no police attendance requested – this often means incidents remain uncleared, reducing clearance rates while crime rates increase. In addition, lack of information from the IP means detection of offenders is virtually impossible.

Proposals for Further Action

Multi-agency approach with Housing authorities re. Tenancy agreements and housing policies
⇒ In attempting to tackle the Criminal Damage problem in the DCU, it is necessary to work with other agencies whose legal powers can complement/add to those of the PSNI. Housing Associations have powers to deal with tenants involved in anti-social behaviour. They should be encouraged to have tenancy agreements, which should also include sanctions available for use against tenants whose children commit Criminal Damage/YCA in an area. In return police could agree to provide evidence to organisations to assist civil proceedings where nuisance/criminal tenants had been identified (i.e. act as witnesses/evidence gatherers).
⇒ Another suggestion is that an arrangement could be made between Housing Authorities and Community Groups that a proportion of any reduction in the cost of Criminal Damage in a particular area for the next year, will be passed back to that area in the form of funding for projects devised by that Community - this could be, for example, improvement of facilities for young people, or of lighting, or provision of a youth worker for x hours per week in that area. This
gives ownership of the problem to the local community, and may result in peer pressure being applied within the area for young people to 'clean up their act'.

The final suggestion is that consideration should be given to Housing Authorities policies in relation to placement of families. If an estate has a high number of families with teenage children, there is more likely to be reports of youths congregating, leading to an increase in Criminal Damage and YCA. This will be compounded if the area lacks social and recreational provisions for young people. Wider dispersal of families with teenage children throughout the DCU may help to reduce the problem. Things to be considered in housing policies include the combination of features of design and layout, the social make-up, interactions of inhabitants and the overall management of the area (Source: Preventing Vandalism: What works?, Police Research Group)

Criminal Justice System – mediation between victim and offender
A recent study (Attitudes to Crime, Crime Reduction and Community Safety in N.I, March 2000) found that around half of people in N.I think that the police and courts do not have enough ways of dealing with young offenders. It also found that ¾ of people would be prepared to participate in a meeting to help decide what would happen if a young person was to commit a petty crime against them. Four out of five people questioned in the 1996 British Crime Survey believed the most effective solution to crime lay outside the criminal justice system and in the home, the school and the workplace.

Some form of victim-offender mediation might be beneficial in tackling the criminal damage problem, so long as all parties consent and the offender has admitted guilt. Reparation by the offender in the form of service or payment to the victim or the local community could then be agreed.

It is also necessary that potential offenders know some form of action will be taken against them – encouraging officers to be positive and to consistently intervene at a low level, should result in an increase in public confidence in the police, diminish general fear of crime, and effect changes in the public’s behaviour. (Source: Tackling Anti-Social Behaviour, Home Office Publication)

Target hardening in hotspots, and use of CCTV
Target hardening measures should be considered in hotspot areas, and in particular, at locations of repeat victimisation. This might include using polycarbonate for windows (which is resistant to smashing but looks like glass), increasing perimeter security, improving lighting, and restricting access to certain areas or opening up hidden areas vulnerable to vandalism to improve sight lines. Surveillance from residents should also be encouraged – this could be in the form of neighbourhood watch type schemes, promoted through community forums. Research has shown that offenders will often be deterred if they think the environment is controlled by its users and residents.

The addition of a PA system to the CCTV cameras in hotspot locations in the City Centre, and in the commercial area of the Waterside, could also help with the problem. People monitoring the CCTV could activate a pre-recorded message telling would-be offenders that they are now being monitored, if suspicious activity is observed. This would be a simple way to deter likely offenders without infringing on Human Rights Legislation.
In a recent study (Attitudes to Crime, Crime Reduction and Community Safety in N.I., March 2000) increased discipline in the family is both the most commonly suggested crime reduction measure and the one rated most important by the greatest proportion of people in N.I. The attitude and behaviour of parents/partners is likely to have an effect on the likelihood of re-offending. Some police forces in England have developed a formal letter system to parents of identified perpetrators, to inform them of their child’s behaviour. This includes notification if alcohol has been confiscated from a youth. If a first letter is ignored/not acknowledged, parents would be asked to attend the police station for a meeting. A Juvenile Nuisance Register is also maintained. If approaches to parents are ineffective, police can show details of the child’s incivilities to the Crown Prosecution Service and police could prosecute.

Another approach is one of diversion of young people, by providing other means of entertainment rather than Stoning houses/cars in the evenings – this depends on provision of social and recreational facilities, and will require police and youth workers to work together to ensure aims aren’t conflicting and to inform each other of any street-based outreach work. It is also important to consult young people in what they want and tap into their creativity for providing solutions.

Targeted high-profile patrolling
Hotspot locations and times in each Sector have been highlighted in detail in this report. This information should be used and built into routine patrolling patterns, using high-visibility policing methods. Problem locations should be visited three to four times during each ‘hot’ time, dispersing crowds, moving people on and confiscating alcohol from underage drinkers.

A standard guidance note should also be produced for all officers identifying possible scenarios and legislation which can be used in these circumstances, and evidence required. It could also provide guidance on handling queries from members of the public about what police intend to do in certain situations. This will ensure a consistent approach from all officers, and increase chances of successful prosecution.

Media campaign for Criminal Damage Reduction Strategy
If an initiative is devised and implemented in the DCU it is important that the media are brought on board and used to publicise the aims of the initiative, so that the general public can be informed before it begins. This should generate local support and by giving an early warning of the tougher approach to criminal damage to come, minimise possible subsequent complaints about police ‘heavy-handedness on soft targets’.
Vehicle Crime in Foyle DCU

'This information is based on incidents reported from a variety of PSNI sources and is believed to be current at the time of publication. These figures refer to incidents only and do not represent official crime figures. This information has been provided by the PSNI and must not be quoted without express permission of Foyle DCU Commander.'
Background to Problem

- TADA Offences doubled in January 2003, compared to December 2002. It is now at its highest level in the DCU in 12 months. TADA also peaked in January 2002.
- More than 1 car a day is now stolen in the DCU, in addition to attempts to steal cars.
- The majority of stolen cars are recovered (87.5%), and the majority are recovered within 24 hours, suggesting cars are stolen for joyriding/fun, as opposed to being stolen to order.
- Joyriding and Car Crime is perceived to be a problem in most of the Northern Estates and Ballymagroarty.
- Although some random operations have been carried out to deal with Car Crime, a combined approach by all units in the DCU has never been formulated.

This report aims to identify hotspot locations, outline the perceived causes of the problem and suggest some proposals for further action, to be used as an aid to planning a Strategy to reduce Car Crime in Foyle DCU.

HOTSPOTS
The main hotspots are:

- Elaghmore Pl/-Capall Court/Cashelhill Pl/Racecourse Rd area for TADA and Damage to Vehicles
  Most likely to occur: Late shift into early hours from Thursday to Sunday
- Fergleen/Ferdale/Knockalla/Ederowen/Bloomfield area of Shantallow West for TADA and Damage to Vehicles
  Most likely to occur: 18:30—early hours from Thursday to Sunday
- Collon Lane/College Glen/Carmhill area for TADA
  Most likely to occur: overnight at weekends
- Ballymagroarty for Damage to Vehicles
  Most likely to occur: during late shift at weekends

The attached maps shows locations where Car Crime occurred in January in the Shantallow West area and in the Ballymagroarty/Springtown areas. These should be used as an aid to planning Operations.

Vehicles most likely to be targeted
The 2 main categories of cars targeted for theft in the DCU in January were:

- Older cars—seen by offenders to be less secure, it is also likely that knowledge of how to steal these cars is more widespread than for newer models
- Familiar cars—mainly Vauxhall and Ford

MO
MO information recorded on ICIS on car thefts in Foyle DCU is very poor. The following is known:

MO information recorded on ICIS on car thefts in Foyle DCU is very poor. The following is known:
Older cars: Door is usually bent/forced open, steering column is damaged and vehicle is hot-wired

Newer models (post-1997): In the majority of thefts of newer cars (14 of 20 cases), the keys have been stolen in creeper burglaries or they have been dangler thefts—keys have been left in the vehicle outside business premises/homes.

Possible interception points for locating stolen vehicles before they've been abandoned
The ClOs, Strand Rd have identified the following locations as likely places where cars are rallied around for 'joyriding', and these should be viewed as possible interception points for locating stolen cars being driven before they are abandoned

- Lonemoor Road/Creggan Estates/Border Roads Sector B/Northland Road—should be considered as possible location to look for vehicles which have been stolen from Ballmagroarty/Hazelbank/Lower Rosemount
- Glengallagh Road—should be considered as possible location to look for stolen vehicles from Galliagh/Fergleen/Moss/Bloomfield Parks, Lower Ballymagroarty, and Carnhill Estate
- Lower Strand Road, using roundabouts at each end as turning points—should be considered as possible location to look for stolen vehicles from side streets of Lower Strand Road
- Crescent Link/Clooney Road, particularly around Caw—should be considered as possible location to look for vehicles stolen from Sector F and from Strathfoyle

Proposals for Further Action

OPERATIONAL RESPONSE

§ Covert presence in the hotspot streets during the key times identified may help to identify culprits involved.

§ Where high visibility patrolling is undertaken in hotspot areas the use of a roof mounted camera may help to identify any likely offenders in the area. The submission of Cl1’s on any likely offenders/culprits should be encouraged.

§ The use of a stinger device should also be deployed in the pursuit of stolen vehicles and in operations in areas where joyriding is reported to be high

§ More use of forensics, particularly more and better use of fingerprint evidence should be encouraged, to make more identifications of offenders

§ Consideration should also be given to how information on these incidents is recorded, particularly with regard to specific locations (stolen and recovered), specific times incident has occurred, MO used in the theft, and state of vehicle at recovery. This information would help improve the accuracy of any further analysis

§ Production of Subject Profiles on TADA suspects in the City, particularly those highlighted in the attached chart, may help to focus officers on likely offenders
CRIME PREVENTION RESPONSE

§ Implement an Education Program to advise potential victims in hotspot areas on how to minimise the risk to their vehicles, including:
  - Parking in well-lit areas, or in driveways/garages, where possible
  - Removing keys from vehicle, even if it's just outside the house/business premises
  - Not storing car keys near the door when in the house
  - Not leaving valuables in view in parked cars
  - Use of security products - use of Crime Prevention Car in Shopping Centres to raise awareness

§ Use of traffic wardens to provide natural surveillance, by increased patrolling in areas of on-street parking which have been identified as hotspots

§ Liase with DVLA to locate and target unlicensed vehicles, aiming to immobilise/remove/dispose of them. This would also help reduce the problem of youths rallying around in scrappers, which currently adds to the number of Hit & Run RTC's in the City

§ Liase with Derry City Council to ensure the speedy removal of burnt out or abandoned vehicles from housing estates—this should discourage youths from coming into/congregating the area and prevent reports of YCA and further crime. The speedy removal of scrappers would also reduce opportunities for arson by groups of youths, 'just for fun'

§ Liase with D.o.E to improve Car Park security in the City, including improved surveillance, limiting pedestrian access, use of cameras to monitor exit points etc. Also liaison with local Health Board/Altnagelvin Hospital to improve car park security. The introduction of a flat rate parking fee could help to finance this. Increased security or surveillance by car park attendants could also help reduce other crime in the Hospital area.
YCA in Foyle DCU

‘This information is based on incidents reported from a variety of PSNI sources and is believed to be current at the time of publication. These figures refer to incidents only and do not represent official crime figures. This information has been provided by the PSNI and must not be quoted without express permission of Foyle DCU Commander.’
Background to Problem

- In the time period 01/04/2002 - 31/03/2003, there were 1541 reports of YCA in the DCU—equivalent to 4 reports per day
- Incidents are most likely to occur during Friday – Sunday, particularly between the hours of 17:00 – 03:00.

The graph below provides a monthly breakdown of YCA incidents in Foyle DCU

![Monthly Breakdown of YCA](image)

The table below gives a Sector breakdown of all YCA incidents in Foyle DCU

<table>
<thead>
<tr>
<th>Sector</th>
<th>A</th>
<th>B</th>

<td>92</td>
<td>147</td>
<td>196</td>
<td>321</td>
<td>266</td>
<td>52</td>
<td>177</td>
</tr>
</tbody>
</table>

The main Sector areas where incidents of YCA are occurring are The Diamond area, Ebrington area, Culmore area and Strathfoyle area.

Analysis of Problem

There are various causes regarding youths causing annoyance in Foyle DCU. These are:

- Few activities for young people in various areas of the City
- Insufficient leisure facilities in the City
- Underage drinking
- Known locations where youths gather to drink alcohol – i.e. City Walls
- Decline in visible police presence due to the decline in numbers of Sector personnel
There has been a sectarian element to some of the reports of YCA, particularly in the Fountain and Irish Street interface areas.

Reports of YCA has shown a strong link between YCA and criminal damage incidents. Various initial reports of YCA often result in criminal damage occurring.

**Proposals for Further Action**

- Patrols should pay particular attention to hotspot areas at the peak times identified.

- Consultation with various youth/community leaders in the various areas as to the provision of activities for youths in their areas, various clubs, activities could be organised.

- The owners of various off licenses in the hotspot areas should be spoken to in order to remind them of the rules and regulations involved with serving alcohol to underage persons.

- Home Office Research highlighted that Police on the mainland have implemented a policy of ‘parental enforcement’ to deal with YCA and anti-social behaviour. If the children are identified as carrying anti-social behaviour then the parents are contacted in an informal manner. If this fails to reduce the behaviour of these children then a more formal approach towards the parents will take place persuading parents to take responsibility and exert control on their children. This more formal approach involves showing video coverage of their children causing annoyance.

- Consideration may be given to adopting a ‘restorative justice’ programme where youths involved in anti-social behaviour, when identified are required to repair the damage they cause. Similar schemes to this in the mainland have had some success in deterring youths from re-offending.
TILLEY AWARD 2003

Description of the Pilot 'Alert Communities in Action'

Project Conducted in the Eglinton & District Area
ALERT COMMUNITIES IN ACTION

A Community Safety Programme for Rural Communities

A Demonstration Project by Eglinton & District Community Forum

BE ACTIVE! BE ALERT! BE INVOLVED!
BACKGROUND

Eglinton & District Community Forum

Eglinton & District Community Forum was formed as an association on Tuesday 26th March at the White Horse Hotel, Campsie. The association, known as the Eglinton & District Community Forum, was formed from an interested body of local people who had previously participated on a community police liaison committee. Following a series of workshops and information sessions and the design and implementation of a business/action plan, the forum was formally constituted on the above date.

The aims of the forum are as follows:

- To improve community safety by involving local people in finding solutions to local crime and associated problems.
- Improve relations between the police and the community.
- To formalize links with other organisations with a vested interest in public safety to develop working relationships with them and in particular the Police Service.
- Produce a Community Safety Action Plan for the Eglinton area in partnership with the relevant authorities.

The above objectives relate to the ongoing community development programme in Eglinton. In order to address these objectives and responding to a needs assessment, the issue of rural community safety has been identified as an area of concern for local people living in the Eglinton, Lettershandoney and Campsie areas.

These concerns have been identified by consultation with members of the older residents in the area, members of the community forum and by regular meetings/consultation with the local PSNI officers from Eglinton.

Following this identification of need an application for funding for a Community Safety Project was made to the Rural Community Network for a small grant to undertake a pilot project on these issues. It is expected that this funding will be in place by October 2002.

Eglinton & District Community Forum is currently in the process of developing a demonstration project on rural community safety. The project will involve up to 30 local people who have been identified through the Eglinton Community Forum or have been referred by the local community police officers from Eglinton PSNI. The project will in the first year provide village signs promoting the area as an Alert Community Area, leaflets promoting a 'Good Neighbour Scheme' and, subject to funding, put in place practical assistance with home security measures for those identified in need. A funding application for the project has been made to the Rural Community Network and The Awards for all grant.

It is hoped that the one year demonstration project will create a partnership approach to rural community safety issues and will demonstrate the need for further work in developing the need for the creation of an active alert community.
SAFE IN THE COMMUNITY

The concept of community safety and the need to feel secure within your own home in particularly necessary for residents who live in a rural community. This project will seek to create a sense of well being and community participation among participants. It will also strive to create a partnership approach to the issues of community safety. The demonstration project will be in the first year, targeted at the elderly, disabled and those who have been identified as vulnerable. As a result of the demonstration project, it is hoped that the project can be further developed into an 'Alert Community Scheme' or 'Good Neighbour Scheme'.

WHAT IS AN ALERT COMMUNITY?

In community development terms, an alert community is defined under the following terms:

- An Alert Community Scheme is a scheme organised by voluntary/community groups in association with the local law enforcement agencies.
- A scheme which aims to prevent attacks on elderly and vulnerable people by criminals.
- Reassurance for the elderly etc living in the locality that their neighbours/community are concerned for their well being.
- A scheme, which ensures that 'good neighbours', are alert to suspicious activity in the area and make contact with the local PSNI officers where necessary.
- Foster better relations between the local community and local police.

A GOOD NEIGHBOUR

What can a good neighbour do?

- Get to know your neighbours, particularly those living alone.
- Call in and visit, run an errand – it's the small things and human contact that counts.
- Be alert – if you see any persons or a vehicle acting suspiciously in your area, call the police at any time.
- Keep an eye on your property and that of your neighbours – help to prevent vandalism and theft.
- Be aware of safety initiatives.

YOUR COMMUNITY NEEDS YOU – PLAY YOUR PART

Community safety project launched in Eglinton

By Amanda Williams

All three will be involved in making this work and promoting the importance of healthy lifestyles.

Commenting on the project Sector Manager of the Belfast District Command, Inspector Martin Keneally said: "There are many examples of good community work and the Eglinton District Alert Community is a good example. The project is an excellent example of what can be achieved through partnership working," he said.

The Alert Communities in Action project comprises a number of organisations, including the PSNI, the Housing Executive and the Community Safety Partnership.

Mr. McSweeney also highlighted the potential work of the Housing Executive in promoting a Good Neighbour Scheme, which will be set up in the area.

"This project is an example of what can be achieved through partnership working," he said.

The project will be officially launched next month.

Owen is a star pupil

Owen McDonnell, in primary 7 at the Eglinton Primary School, has recently been presented with an award for his excellence in maths.

The best 12 pupils were invited to take part in the Northern Ireland Expressions Challenge, which is now underway and welcome.

"The Housing Executive has recently been involved in helping to set up this programme," he said.

"We are delighted to be part of the Housing Executive's support for the community safety project," he said.
POLICING WITH THE COMMUNITY IN FOYLE DISTRICT COMMAND UNIT
THE EGLINTON AND DISTRICT 'ALERT COMMUNITY' SCHEME

1. There are many examples of sound community policing initiatives and practises across Northern Ireland. The proposed Eglinton and District 'Alert Community' project is one such scheme. The Independent Commission on Policing in Northern Ireland recommended that 'Community Policing' should be the core function of every Police Sector.

The Chief Constable has approved a policy which describes the philosophy and aims of community policing. It is a framework within which local policing services can be tailored to meet local needs.

The policy is built on 5 key principals -

1. Service Delivery
2. Partnership
3. Problem Solving
4. Empowerment
5. Accountability

These principals are mutually dependent, taken together they will shape how we approach policing issues as individuals and as a service. The term 'Policing with the Community' describes what most people want to see - the police participating in the community and responding to the needs of the community and the community participating in its own policing and supporting the police. It will be seen as the police service's contribution to community safety and will be delivered in furtherance of the statutory duties of police officers.

2. COMMUNITY SAFETY

The philosophy of community policing has been recognised in many parts of the world as a valid approach to improving community safety and this also applies to policing in Northern Ireland. The many developments in community safety across the public, voluntary, community and private sectors must also be taken into account.
The Criminal Justice Review 2000 recommended that a community safety strategy be developed for Northern Ireland and that statutory obligations be placed on public bodies to work together in this important area. Community safety is about making communities safer places to live and improving the quality of life for local people by working together with them and other agencies to find solutions to local problems. The key elements to improve the quality of life in communities are:

- Reducing crime
- Reducing fear of crime
- Tackling anti social behaviour through Interagency partnerships
- Community involvement
- Problem solving to find sustainable solutions

Community policing establishes direct accountability between the community and the police at a local level as a result of the partnership. On the one hand accountability rests on the transparency of the police and on the other hand on the responsibility of the community to assist the police in preventing and combating crime and disorder. There is therefore a joint responsibility and accountability.

3. PARTNERSHIP

The Police (Northern Ireland) Act 2000 provides legislative guidance on the establishment of District Policing Partnerships. These should be broadly representative of the community so the service provided reflects local needs and concerns.

The objective of this partnership is to determine community needs and policing priorities.

Other partnerships include local community forums to address local problems.
The partnership we have with Eglinton and District Community Forum has decided to introduce an 'Alert Community' programme to address local problems. Consultation has taken place with other groups with similar schemes and I would ask that you embrace the scheme in an effort to enhance community safety in the Eglinton and district area.

4. **EMPOWERMENT**

It is important to create a sense of joint ownership for addressing crime and community safety among the community and the police. There is therefore a need to raise community awareness of the issues affecting community safety.

There is a need to empower local officers to determine their own local priorities and set down their own objectives in consultation with community representatives and community forums. The community should also be empowered to identify problems in their areas and play a part in the solution, together with police and other agencies.

The 'Community Alert' project is a scheme designed by the Eglinton and District Forum in partnership with the police and other agencies, to promote community safety and consequently the quality of life in the area.

5. **ACCOUNTABILITY**

Accountability will be realised by creating mechanisms through which the police can be made answerable for addressing the needs and concerns of the community they serve. Such mechanisms already exist such as the Eglinton and District Community Forum.

Community Policing creates great opportunities for partnership and problem solving by working more closely with the community, thus accountability becomes a natural consequence.

If a police officer is tackling a problem identified locally in partnership with the community and other agencies he or she should be in a position to account for what can and cannot be done.
6. CONCLUSION

The Eglinton and District 'Alert Community' project is a sound example of a community initiative to enhance community safety and improve the quality of life for all sections of the community.

Community policing, while a matter of style, is also an attitude of mind, both for police officers and for the public. It is as much a matter of philosophy as it is of method and it amounts to a profound shift in police and community thinking with an underpinning recognition that "Policing is much too important, much too impactive on all of our lives, to be left the police alone".

The involvement of the community and their support is essential so that police resources can be targeted at priority areas. Crime and anti-social behaviour and fear of crime bring misery to vulnerable people as well as impacting on the entire community. All sections of the law-abiding public have a role to play in making their communities safer through inclusive partnerships that support and inform policing and interagency activity.

The Eglinton and District 'Alert Community' project is a scheme designed to improve the quality of life for all and will specifically target a number of elderly and vulnerable persons during the pilot.

From a policing perspective, I would commend the scheme to you. Community safety is a realistic goal and can be achieved through community partnership. The police contribution to building a safer area will be through Community Policing.
Policing With the Community in Foyle District Command Unit

The Eglinton & District “Alert Community and Good Neighbour” Project

Inspector Milton
Sector Policing Manager
Foyle District Command

Chief Constable’s Policy on Community Policing

5 Key Principals

- Service delivery
- Partnership
- Problem solving
- Empowerment
- Accountability

Community Safety

- Statutory obligation on public bodies to work together to improve “community safety”

- Working together to find solutions to local problems

Key Elements

- Reducing crime
- Reducing fear of crime
- Tackling anti-social behaviour
- Through
  - Interagency partnership
  - Community involvement
  - Problem solving

Partnership:

“The collective effort of the police, community and other agencies to problem solve”.

Empowerment

- Encourage local people to actively participate in policing
  - And
- Empower local officers to do the job
Accountability

Police officers at all levels to be assessed and responsible for the service they deliver.

Conclusion

"Policing is much too important, much too reactive on all our lives, to be left to the police alone."

The Eglinton & district "alert community and get neighbours" project is a scheme designed to improve the quality of life for all and as such, local police give it their full support.
EGLINTON AND DISTRICT COMMUNITY FORUM

"Working in Partnership for a Safer Community"

EGLINTON AND DISTRICT COMMUNITY FORUM

MARY LYNCH
Project Manager
Rural Community Network

EGLINTON & DISTRICT COMMUNITY FORUM

WHO WE ARE:
* The Forum was formally constituted on 26 March 2002
* Members of the Forum reside or work in the area
* Members share a common goal to improve the quality of life for all residents
* Meet locally on a regular basis

Eglinton

Tamnaherin
EGLINTON & DISTRICT COMMUNITY FORUM

Aims and Objectives:
* To improve Community Safety by involving local people in finding solutions to local crime and associated problems
* To formalise links with organisations who have a vested interest in Public Safety and develop a working relationship with them
* To produce and implement a Community Safety Action Plan for the Eglinton area

The Project
* 30 Older Persons identified by the Forum or referred by Statutory Organisations - Police, NIHE
* Provide village signs promoting an 'Alert Community Area' and leaflets promoting a 'Good Neighbour Scheme'
* Practical Assistance and Home Security Measures for those in need

WHAT IS AN 'ALERT COMMUNITY' SCHEME

* It is organised by Voluntary and Community groups in association with the local law enforcement agencies
* Aims to prevent attacks on older persons and vulnerable people
* Reassurance for the Elderly, e.g. Neighbours and Community should be concerned for their well-being
"Grind Neighbours" are alert to suspicious activity in the area and notify police.

Postcard: Better relations between the local community and the police.

**What is an Alert Community?**

- 'Good Neighbours' are alert to suspicious activity in the area and notify police.
- Foster better relations between the local community and the police.
WHAT CAN A 'GOOD NEIGHBOUR' DO?

* Get to know your Neighbours - particularly those living alone
* Call in, Visit or Run an Errand - It's the small things and human contact that makes a difference
* Be Alert - Notify the Police of Suspicious Activity at any time
* Keep an eye on your Property and that of your Neighbours

EGLINTON & DISTRICT COMMUNITY FORUM

The project will:
* Target
  - Older persons
  - Disabled people
  - Vulnerable people
to provide Support and Reassurance
* Create a Partnership Approach to Rural Community Safety Issues
* Demonstrate the need for an 'Active and Alert' Community

YOUR COMMUNITY

NEEDS YOU TO PLAY YOUR PART

* BE ACTIVE!
* BE ALERT!
* BE INVOLVED!
TILLEY AWARD 2003

Letters from the Endorsing Chief Officers for the

'Alert Community in Action' project
Dear Inspector Kerr,

Thank you for the opportunity to join with yourselves and the Rural Community Network in submitting a bid for funding under the Community Safety Challenge Competition.

A growing element of our work is to contribute to community safety which is the responsibility of a number of agencies as well as involving the community itself. The recent appointment of Neighbourhood Wardens by the Housing Executive helps us link better between communities and the District Offices in dealing with problems of crime, anti-social behaviour and neighbourhood nuisance.

This particular initiative with 'Foyle Community Forums' has the capability of reducing crime and the fear of crime on many of our estates, both urban and rural, hence our willingness to come on board as a partner.

The Housing Executive would like to provide practical assistance to the project which will take two forms.

a) the assistance of 5 Neighbourhood Wardens throughout the District for a minimum of 2 hours per week on issues related to the project. This equates to approximately £4,000 per annum.

b) The installation of approximately 300 home security packages in Housing Executive properties at an approximate cost of £4,500 per annum.

I am also investigating the possibility of making a financial contribution to the project but due to the short timescale, I have not received confirmation of this. I will be in contact in due course.

I look forward to continuing the relationships we have developed over the years and wish you luck with this bid.

Yours sincerely,

[Signature]

Mr S Mackie
Area Manager
Dear Inspector Kerr,

I am pleased to confirm that the Housing Executive will be in a position to contribute £3,000 p.a. towards the project submitted for the Community Safety Challenge Competition should the bid be successful.

I trust you will keep me informed of progress with this bid and I hope we can develop a successful partnership approach in dealing with important aspects of our work.

I would also advise, for your information, that we are contributing £1,000 to the Eglinton & District Community Forum to assist with their alert communities project and will be presenting a cheque to them in the near future.

Yours sincerely,

Mrs Arvil McAllister
District Manager

c.c. Ms Mary Lynch
To whom it may concern

Police in Foyle District Command Unit have been working closely with all the community forums operating in the Derry City Council area since April 2001. Prior to this our main source of contact with the community was through the community police liaison committees.

In October 2002 the chairpersons of all the forums came together to discuss community safety and share best practise. This was so successful that they decided to form this group into a constituted community forum under the name "Foyle Community Forums Partnership". The police and other statutory and voluntary agencies are currently working in partnership with the forum to develop a community safety project for the council area under the heading "Alert Communities in Action". Support for the project has been expressed to me by numerous people including MLAs, local councillors and members of the policing board. The application for funding to run the project from the Community Safety Challenge Competition has the full support of the police in Foyle DCU. I am also aware that funding and funding in kind has already been offered to the partnership to assist them with the project.

From a policing perspective, I believe the project will go a long way to developing "Policing with the Community" and will undoubtedly improve community safety and the quality of life for all. The partnerships application is therefore strongly recommended.

Yours faithfully

M KERR
Inspector
Sector Policing Manager
Foyle DCU

Ext 40754
TO WHOM IT MAY CONCERN

As the Chairperson of the Foyle Community Forum Partnership which includes the Chairpersons of 11 Community Forums in the Derry City Council area, I am pleased to be working in partnership with a number of statutory and voluntary agencies. It is our intention to carry out a community safety initiative under the title of 'Alert Communities in Action'. This project has already been piloted in Eglinton & District area and has proved to be a great success.

I am pleased to be working in partnership with the Police Service in Derry on this project, which I have every confidence will reduce crime, the fear of crime and anti social behaviour.

K DOHERTY
Chairperson
Foyle Community Forum Partnership
APPENDIX 'D'

TILLEY AWARD 2003

Foyle DCU Aims and Objectives Regarding

‘Policing with the Community’
In Foyle District Command Unit our aim is to deliver the goal of making ‘Policing With the Community’ the core function of our service. We introduced Sector Policing on 1 April 2001 by forming 8 sector areas, such with dedicated community policing teams. Each team has a Sector Commander (Sergeant) and the DCU has a Sector Policing Manager, whose purpose is to manage the service delivery of sector policing and community safety in accordance with the Patten Report and the Oversight Commissioner’s Report. Each dedicated policing team has responsibility for policing its own area in accordance with the Chief Constable’s Policy which describes the philosophy and aim of community policing. The key principals of this are service delivery, partnership, problem solving, empowerment and accountability. These principals are shaping how we approach policing issues as individuals and as a DCU.

We have recognised that we cannot be truly effective when working alone, that the community and other agencies are needed to ensure effective problem solving. Our community police currently work in close partnership with 10 community forums, with representatives from every area of the DCU in addition to the majority of statutory, voluntary and private sector agencies. They are encouraging local people to actively participate in policing and we have empowered local officers to determine their own local priorities and objectives in consultation with them.

All our community officers have undertaken to serve at least 3 years in their sector, circumstances permitting, however, the wearing of names and the area of their responsibility has yet to be introduced.

All our probationary police officers undertake operational phases of their training, doing team policing in the community and under the guidance of a Tutor Constable.

The community officers, when practicable, patrol on foot wearing high visibility jackets. The amount of their time spent on beat patrols is measured weekly.

Our officers use a problem solving model to study crime and disorder problems in a structured way to identify underlying causes and offer solutions. Their performance can be monitored by the number of solving folders opened/resolved. To quality assure their work and as a reference for best practice, a central registry of solved problems has been established, to which each community officer has access.

In conclusion, Foyle DCU, at all levels, has recognised that the involvement of the community is essential to reduce crime, fear of crime and anti-social behaviour. To that end, we are accessible to the community and responsible for the service we deliver.

Our officers are working in partnership with the community at local level to solve local problems, improve community safety and enhance the quality of life for all.
