Key Description : LAUNDRY ROOM THEFTS

Problem Description :

Leslie Manor had suffered three breakins in the laundry room recently. Culprit(s) would remove the top of the washing machine and dryers to steal the coin boxes, which were attached to them. The new manager of the apartment asked for advice and was offered some security ideas by Cst Innes.

Problem solving strategies and results :

The manager implemented a signout procedure that involves tenants signing out a key to use the room. The room was outfitted with an additional lock to better secure the door and room.

There has not been a theft from the laundry room since these changes.
